

RADIATION PROTECTION FOR SENTINEL LYMPH NODE LOCALISATION PROCEDURES

A one day course held at RPC, South London

The course aims to provide training in radiation safety management to persons acting as Radiation Protection Supervisor for sentinel lymph node localisation procedures using Tc-99^m. The course aims to cover all regulatory requirements as well as guidance on safe working practice. It is also suitable for all nurses, ODPs, physicists, radiographers, surgeons and other staff involved with the procedure

COURSE CONTENTS:

- **INFORMATION ABOUT THE PROCEDURE**
- **WHAT IS RADIATION AND HOW IS IT HARMFUL?**
- **LEGISLATION AND GUIDANCE**
- **CONSIDERATIONS BEFORE STARTING**
- **SAFE WORKING PRACTICE AND LOCAL RULES**
- **CONTAMINATION MONITORING**
- **STAFF DOSES AND RADIATION RISK**
- **WASTE MANAGEMENT**
- **PROBE MAINTENANCE AND CALIBRATION**

Testimonials from previous course delegates:

“Great course, thoroughly enjoyed it!”

“Enjoyable, informative and interesting. Well run with good speakers and pitched at a level that all could understand.”

“Well organised and informative.”
